# Regional water availability report

lundi 18 mars 2019

## **Weekly edition 7 January 2019**

WaterNSW manages and operates 42 dams and storages to deliver water for environmental, domestic, town water, stock, industrial and irrigation purposes across the state.

WaterNSW storages provide supplies to all the major river systems in Western NSW, Greater Sydney, the Southern Highlands, Shoalhaven Bay as well as the Hunter, Bega, and Iron Pot valleys in coastal NSW.

The total active storage percentage of rural water supplies on 7 January 2019 was 37.5% of the total active storage capacity. This was a decrease of 1.4% from last week.

The total storage level of urban water supplies on 7 January 2019 was 60.9% of the total storage capacity. This was a decrease of 0.4% since last week.
